

Leadership

Healthy communities are comprised of healthy citizens

A community can choose its future. That is why over thirty years ago, a group of concerned citizens formed The Foundation to help provide direction for growth in the community. The leadership effort was initiated by corporate and citizen interests and created the initial goals and plans for the foundation.

What has the foundation done?

The direction provided by foundation leadership has contributed to programs that have had a dramatic impact on the New Richmond area community. The actions of the Foundation have resulted in the creation of the New Richmond Preservation Society and the rescue from burning of the Bell-Tierney house which became the Heritage Center. Consider the creation of our first specific fund-The NRACF Recreational Trails fund and the sponsorship of the Multi-Purpose Pathways Committee which has led to the development and nurturing of our area trails.

What are we currently leading?

Leadership Trust Initiative-this long term program helps develop the leadership skills of our area

citizens, so that collectively we can choose our future.

Front Porch Project-Using the principles of civil discourse, we invite our community to focus on issues that concern us. The Government Entities Network-an offshoot of the Front Porch Project, is an effort to initiate effective and constructive dialogue between various area governments.

What is on the horizon?

Leadership Trust Initiative graduates are committed to giving back to the community that nurtured them. Each graduate chooses a project to help make a positive difference in our community. Our goal is twenty graduates a year.
